

ALEJANDRO DE LA TORRE ZAPARDIEL

Product UX Architect • UX Strategist • Product Designer

Location: Madrid, Spain Email: atorrezap@gmail.com

LinkedIn: linkedin.com/in/alex-delatorre GitHub: github.com/alexdelatorre Portfolio: alexdelatorre.github.io

PROFESSIONAL PROFILE

Product UX Architect and Product Designer with 4 years of experience specializing in complex systems, robotics, and mission-critical software. Proven track record in abstracting high-density engineering and operational requirements into clear information architectures, scalable mental models, and intuitive user flows. Focused on logical product redefinition, conceptual design, and Human-Machine Interface (HMI) optimization. Skilled at aligning long-term product vision with technical engineering constraints, delivering structural usability, system efficiency, and measurable product value.

WORK EXPERIENCE

Product Designer & UX/UI Specialist

Jul 2022 – Present

Lince Systems • Madrid, Spain (Remote)

- **Information Architecture & Critical Interfaces:** Led the conceptual restructuring of the flight user experience for QGroundControl (QGC) in industrial applications. Migrated traditional complex views into mission-based, state-driven navigation flows (e.g., takeoff, maritime navigation, Man Over Board protocols), significantly reducing operator cognitive load.
- **Translating Complex Requirements to Product Logic:** Analyzed and abstracted complex industrial hardware specifications to define the functional integration and real-time control interfaces for advanced payloads (optical/thermal cameras, gimbals, and multi-spectral sensors).
- **Open Source Strategy & Technical Contributions:** Conducted usability evaluations and proposed core architectural enhancements, resulting in recognized contributions credited directly in the official QGroundControl GitHub repository.
- **Conceptual Prototyping & Virtual Simulation:** Built interactive test environments in Unreal Engine (AirSim) to validate UX architectures and user mental models prior to deployment in real-world flight operations.
- **Methodological Handoff & Engineering Alignment:** Authored detailed functional specifications, state diagrams, and logical interaction guidelines, streamlining collaboration and accelerating development cycles between design and engineering teams.

TV Director & Camera Operator (Visual Narrative & Technical Control)

Mar 2021 – Jul 2022

LOVES PRODUCCIONES SL • Madrid, Spain

- Managed real-time technical direction and multi-channel video mixing for broadcast television (RTVE, Telemadrid), handling complex signal management and visual storytelling under high-pressure live environments.

Freelance Photographer & Editorial Projects

Feb 2018 – Mar 2020

Independent Projects • Madrid, Spain

- Developed visual narrative, composition, and digital graphic assets for cultural and editorial publications.

CORE COMPETENCIES

UX Strategy & Architecture

Information Architecture, Conceptual Design, User Flow Mapping, HMI (Human-Machine Interface), Design Systems.

Tools & Frameworks

Figma, QGroundControl (QGC), Unreal Engine, C++, AirSim, Git / GitHub, Agile / Scrum.

EDUCATION & TRAINING

Master's Degree in Web Design & UX/UI

CEI Design School (In progress)

Specialized Courses in UI/UX & Programming

Udemy: Figma UI/UX (2026) | C++ for Unreal Engine

Higher National Diploma (HND) in Digital Image & Photography

CIFP José Luis Garci
